SKILLS

Terraform

Docker

Github Actions

Python

Ansible

Bash Scripting

Kubernetes

AWS

WORK EXPERIENCE

Platform Engineer

VMware/Broadcom/Omnissa

07/2022 - Present

Achievements/Tasks

- Continuously handles on call duties one week per month, which includes monitoring pipelines, responding to developer requests, and debugging infra failures.
- Refactored IAC repositories using tools such as Terraform, Ansible, Docker, Python, and Makefiles. Created Github Action workflows for each repository.
- Led the charge in migrating our infrastructure from a deprecated cloud platform called VCD to vSphere.
- Led the charge in migrating and updating our release automation job from Jenkins to Github Actions. This job helps create a new release for our monolith and micro-services.
- Saved anywhere from 2500GB to 5000 GB of space per day by lowering the disk space in all of our created application VMs that we utilize in our pipelines.
- Assisted in migrating over 500 CI plans from Atlassian Bamboo to Github Actions. Also assisted in migrating over 500 repositories from Atlassian Stash to Github.

EDUCATION

Bachelor's of Computer Science/Mathematics

Pepperdine University

08/2018 - 04/2022

Courses

▪ Computer Networks

▪ Computer Systems

GPA: 3.4

CERTIFICATIONS

CKA Certified Kubernetes Administrator (12/2025 - Present)

AWS Certified Solutions Architect (03/2025 - Present)

Terraform Associate (06/2024 - Present)

AWS Cloud Practitioner (05/2024 - Present)
